

MSL response website design

The Google update of April 2015 means that it is more important than ever for your website to be fully mobile-friendly

MSL can help your website meet these demands and look beautiful on any device

MSL response website design

Make it easy for your students to find the services they need

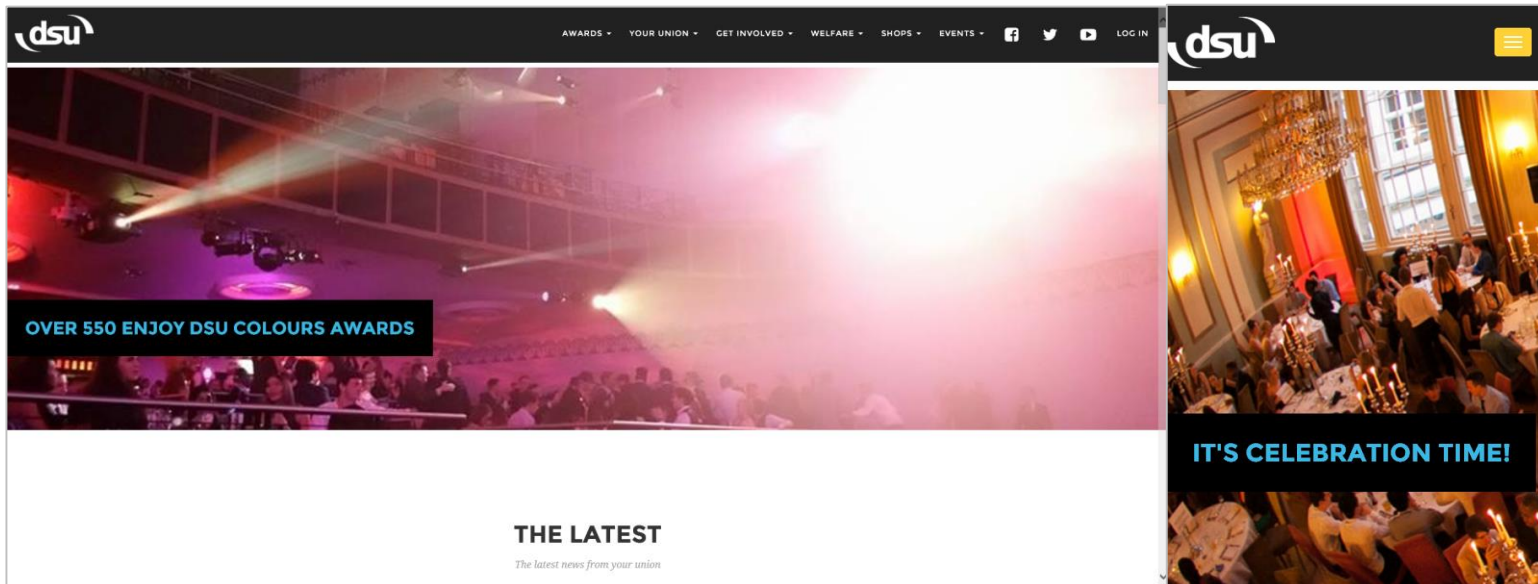

MSL response website design

Encourage members of the public to buy your merchandise

The image displays two versions of the Exeter Box Office website design. The left version is a desktop layout, and the right version is a mobile layout. Both versions feature a dark header with the 'EXETER BOX OFFICE' logo and navigation links like 'Contact Us' and 'Events'. The main content area includes a welcome message, a featured event for Lucy Spraggan on May 20th, and a 'Your Account' section with 'Log In' and 'Register' options. The mobile version simplifies the layout, focusing on the event listing and account options.
